Christian Azar

Shaman Writer

Quebec, Canada

E-mail: Christiaz@Canada.com

Sacred Work

I have a Naturotherapist-Kinesiologist formation. I treat people with herbs, minerals, vitamins and nutraceuticals. I see food as a great source of health if managed properly. I integrate my Shamanic training in my approach to recreate balance in my customers. I define myself as a Holistic Naturotherapist. I use Kinesiology as a way to get information from the body of the customers I treat. Shamanism gives me another level to work on, complementing the physical approach.

Other Passions

I like to play with Harmonics created with my voice. I am working at improving my ability to get the Harmonics I want, and exploring the possibilities of using them for balancing my customers.

Credentials and Current Work

I presently work as a plant breeder. I have a Master's Degree in plant breeding, and a B.Sc. in Plant Science. I am a member of the Quebec Agronomist Association. I work mainly at improving barley and soybeans. I also make selection on wheat, canola, oats, triticale, corn, peas, forrages, linseed and sunflowers. I am interested in others' work at crosses and at selecting cultivars adapted to organic farming. I am also interested in working at the improvement and selection of domesticated medicinal plants.

Areas for Sharing Information

As I refine my skills, I am willing to exchange experiences with other Naturotherapists and Herbalists. There is an ocean of information around us, but little reliable experience-related information. I look forward to exchanging facts.
